## HOFLIND ...

As the place of contemplation, reflection, and intensive perception, HofLind also serves well for conjunction of creativity and practice in many different ways.

Let all the Hearts to merge into One in this magical environment...

*... if Raven appears you are about to experience a change in consciousness.*

*This may involve walking inside the Great Mystery on another path at the edge of time.*

*It would portend a signal brought by the Raven that says:*

*"You have earned the right to see and experience a little more of life's magic".*
